Haetera piera negra

(Felder & Felder, 1862)

Nymphalidae – Satyrinae

Innovation & Quality

This year, SB Talee pays tribute to butterflies, a marvel of nature. The diversity of our beautiful varieties evokes the vibrant colors and jeweled splendor of their wings. Colombia, a butterfly sanctuary, takes pride in being the most biodiverse country in the world when it comes to these mesmerizing creatures. With over 4,000 species, including more than 200 endemic ones, Colombia stands out as a priceless treasure for nature enthusiasts. Thanks to a privileged geographical location, rich geological history, and a variety of oceans, mountains, climates, and different levels of rainfall, Colombia's natural wealth has created the ideal habitat for such an extraordinary diversity. From the Caribbean coast, home of the majestic Sierra Nevada of Santa Marta, to the Pacific Ocean coast, one of the rainiest regions on the planet. From the banks of its most important rivers, the Magdalena and the Cauca, through the Andes mountains towering above the Orinoquia plains to the magical Amazon rainforest. We invite you, to be amazed by the beauty of our varieties and the allure of Colombian butterflies!
